

Free or Low Cost Websites

1. Squarespace

Squarespace is an all-in-one content management system, or CMS. A Squarespace subscription includes content hosting, professionally designed *templates*, 24/7 support, and access to our user-friendly platform for creating beautiful websites. You can use Squarespace to build *Cover Page* sites, websites, and online stores.

Every full Squarespace subscription includes:

- Website building tools - Use our drag-and-drop tools to add content, like text and images, and create a website without directly editing code. Start with any *template* to create *pages* and organize your site, then customize it to match your own style.
- Content hosting - All Squarespace content is stored on our robust infrastructure. This ensures your site will load quickly and reliably from anywhere in the world.
- Professionally designed *templates* - Templates combine unique features and styles into cohesive packages. With responsive design standard on every *template*, your site will look great on any device. You can switch *templates* at any time.
- Search engine optimization - Squarespace automatically generates sitemaps, uses clean *HTML* markup, and uses automatic tagging so search engines can index your content without plugins or extra fees.
- Squarespace Analytics - Explore your site's analytics to understand traffic patterns, referral sources, and other key metrics. Connect with Google Analytics through our built-in integration to learn even more.

Pricing

Personal website	Business website
\$12/month, billed annually or \$16 month to month	\$18/month, billed annually or \$26 month to month
